PROFILE

AI Engineer. I build artificial intelligence systems end to end: agents, assistants over documents (RAG), structured extraction with vision models, and process automation across systems.

I came to AI after thirteen years across the full software lifecycle — developer, QA lead, business analyst, project manager and Agile Coach. That path is what lets me read a process before automating it: automation rarely fails on the tooling, it fails on the process nobody modeled.

Project management and agile are complementary training, not my primary role. The projects I lead are artificial intelligence, agents and automation.

EXPERIENCE

Software Development Lead — AI & Process Automation · Fajas Forma Tu Cuerpo Shapewear

Mar 2026 — Present

- Cross-country Odoo ERP implementation (US, Colombia, Mexico) with Shopify, Amazon and TikTok Shop synced against it.
- Product governance frameworks to eliminate data inconsistencies across platforms.
- AI applied to the decision cycle: meeting analysis, requirement extraction and risk identification.

AI Automation Consultant · Self-employed

Jul 2025 — Mar 2026

- Onest Vision (paying client): GoHighLevel CRM automations — contact management, UTM attribution and reporting.
- Lambda AI (own project): sales-support agent prototype built on Meta APIs and ManyChat.
- 1st place, Best AI Automation — EmprendIA LATAM hackathon 2025.

Agile Leader · Nequi

Mar 2024 — Jul 2025

- Productivity improvement across the software product development value chain.

Scrum Master · Imagemaker

May 2022 — Jul 2023

- Led multicultural teams; scoping and estimation alongside the commercial team.

Scrum Master / Agile Consultant · Sophos Solutions S.A.S.

Jan 2021 — May 2022

Project Manager · Softgic

Aug 2018 — Dec 2020

- Project management under the PMI framework: contract analysis and deliverable tracking.

Senior Software QA Analyst — Team Leader · BVC — Colombian Stock Exchange

2015 — Aug 2018

- QA lead on one of the largest projects in the company recent history. Scala, Java.

Software Developer — Scrum Team · BVC — Colombian Stock Exchange

Jun 2015 — Dec 2016

Development and Consulting Engineer · DIIT Consultores SAS

Feb 2013 — Mar 2015

- Development and consulting on Microsoft Dynamics AX; business analysis and functional documentation.

PUBLIC PROJECTS

AI document validation system Python · GPT-4o Vision · Streamlit — 2026

Automated validation of university admission files: vision-model extraction, auditable business rules, and identity cross-checking between documents to flag possible impersonation. From ~14 minutes to ~5 seconds per document.

postulaciones-mvp.streamlit.app · github.com/ferquintero2013/postulaciones-mvp-utel

RAG chatbot over CV and portfolio Python · BM25 + embeddings · GPT-4o — 2026

An assistant that answers about my background, cites the source of every claim, and declines when something is not documented. Hybrid retrieval (BM25 + vector with Reciprocal Rank Fusion); HyDE was tested and dropped on the data.
